

## SP-GBRK

Epoxy Based - Heat Activated Formulated Adhesive Powder

---

**SP-GBRK** is a elastomer toughened, heat cured, powdered epoxy binder resin that is now available from Springfield Industries. The benefits of SP-GBRK include increased flexibility and a reliable heat curing mechanism. All raw materials used in SP-GBRK are listed as approved for Title 21– Food and Drugs, Volume 3, revised April 1, 2010 (21CFR1875.300). SP-GBRK was specifically formulated as a heat cured adhesive binder for filter fabricating, fiber bonding and associated applications.

Issue Date:	10/14/2020
Specific Physical Form:	Powder Free Flowing
Color:	Off-White
General Physical Form:	Solid
Shelf Life:	3 Years

### Typical Properties -

Specific Gravity:	1.1
Cure Schedule:	350°F for 20 mins
